Location: Cardiff, Wales - United Kingdom

ABOUT ME

What attracts me to technology is the possibility of creating anything my skill makes possible.

Just as the craftsman materializes his own idea or someone else's, the developer, in his own way, does it as well. Both manage to impact people's lives positively.

I believe that through this tool, I can contribute something good as I have received, even if indirectly, throughout my life through art, technology and texts.

All life is a servitude, so said, Seneca.

EXPERIENCE

WordPress Website ::

See Live Preview - <https://dev-eli-detitian.pantheonsite.io/>

The whole project was developed for Eli, a registered dietitian in Wales, United Kingdom using WordPress and hosted with a custom domain and business email. The website features a clean and modern responsive design with easy navigation on any device, making it easy for visitors to find the information they need.

Weather App ::

See Live Preview - <https://triduum-weather-app.netlify.app>

Source Code - www.github.com/angelo-fantino/weather-app

This responsive weather application fetches the weather information typed by the user and displays it on the screen. The application shows the current weather and the next six days ahead. The application was built with HTML5, CSS3, ReactBootstrap, React.js and OpenWeather RESTful API.

Portfolio Website ::

See Live Preview - www.angelifantino.com

Source Code - www.github.com/angelo-fantino/angelifantino.com

This responsive developer portfolio website was built with HTML5, CSS3, Sass, ReactBootstrap and Next.js.

TECHNOLOGIES (FRONT-END)

HTML5 / CSS3 / WordPress / ReactBootstrap / Material UI / React.js / Next.js
